Document Revision History

Version	Date	Description
1.30.5	20080422	Disclaimer updated
	20080520	Revision of the Investment Monitoring chapter
	20080702	Revision of the Multi-Criteria Query Engine chapter, by adding the section "Anniversary between given days and months"
1.30.6	20090603	Alerts are possible on contact reports. Changed screenshot accordingly. Explanations on different notification rendering for related objects. Views on processes from the monitoring section.
1.30.6 SP1	20090907	Inserted Monitoring chapter from CACM User Guide and moved Multi-Criteria Query Engine chapter into the CACM User Guide.
11	20110403	Updated title page to reflect new version.
	20110726	OCS-38756: Removed sections related to Investment Monitoring and Alerts.
12	20120802	OCS-40373: Reviewed and updated several sections in chapter Monitoring regarding the new Notification infrastructure.
	20120802	OCS-40374: Added new chapter "Alerts".
	20120831	OCS-41335: - In chapter "Alerts", updated relevant images to reflect new "Alert On" field. - In section "Overview", renamed target entity "Third-party" to "Client". - In sections "Viewing your private alerts" and "Viewing your public alerts", renamed column "Entity Name" to "Alert On". - In section "Creating new private alerts", renamed field "Target Entity" to "Alert On" and entity "Financial Instrument and Third Party" to "Client and Instrument".
12SP1	20121015	OCS-41816: To explain that archived alerts are now displayed under the Archived tab and can be reactivated: - Added new section "Viewing your archived private alerts". - Added new section "Reactivating archived private alerts". - Updated section "Viewing your public alerts". - Added section "Viewing your archived public alerts". - Added section "Reactivating archived public alerts".
	20121016	OCS-41835: Updated sections "Creating new private alerts" and "Creating new public alerts" to indicate the change to a label from "OneTime" to "Once" in the Frequency field.
	20121022	OCS-41470: Updated sections "Creating new private alerts" and "Creating new public alerts" to indicate the change to two labels in the Monthly Run Frequency field: The label "Specific Day In Month" is now "Day of Month" and the label "Specific Weekdays In Month" is now "Weekdays".
13	20130204	- OCS-41842 and OCS-41843: Moved entire chapter "Alerts" to the <i>Triple'A Plus Web User Guide</i> as Alerts Management is now transferred to Portfolio Analysis. - OCS-41848: - In section Monitoring, added a note to describe the preferred location to view notifications since Triple'A Plus Release 13 and that the Alerts function is now available from another menu. - In section Notifications, updated the description and image of the Inbox section and updated the description for column "Category" and "Nature".
14.03	20140328	Updated title page to reflect new version.

1 Monitoring

The Monitoring module of Triple'A Plus Web provides you with a monitoring feature that informs you (as a logged user) about new events and tasks that must soon be performed (before they become overdue).

To be able to access the Monitoring module, you need to have the correct access rights defined. For more information, refer to the chapter regarding security set-up in the *Triple'A Plus Web Packaging Reference Guide*.

Note: Since Triple'A Plus Release 13, the preferred location to view notifications is from the menu **Portfolio Analysis > Home > Notifications & Messages** where they are displayed together with Triple'A Plus Messages. The display of notifications under the Monitoring module has only been kept for functional backward compatibility. Also, the Alerts function is now available from the menu **Portfolio Analysis > Home > Alerts**.

In this chapter, you will learn about managing the following tabs in Daily Outlook:

- [Today's Events](#)
- [My Activities](#)
- [Notification History](#)

1.1 Today's Events

Today's Events is the default tab in Daily Outlook that displays both new tasks and existing (but unread) tasks, which were assigned by the system to you or assigned by another user or yourself.

Today's Events contains the following sections:

- [Notifications](#)
- [New Tasks](#)

1.1.1 Viewing Today's Events

To view Today's Events, choose **Monitoring > Daily Outlook > Today's Events** or choose **Monitoring > Daily Outlook**.

1.1.2 Notifications

The **Inbox** section displays a list of notifications (organized in a table). To be included on the list, the notifications must be received on the current date (read or unread) or received one or more days before the current date (unread only).

Inbox

☐						Alert	ASM	Medium	You have portfolios with a return < -3%	Feb 4, 2013 11:45 AM
☐						Alert	ASM	Medium	You have portfolios with a return < -3%	Feb 4, 2013 11:45 AM

Results 1 to 2 of 2

Results 1 to 2 of 2

Column name	Description
checkbox	You can perform multi-delete or multi-read/unread operations by selecting the checkboxes of several notifications at the same time and then, selecting the action to perform via the buttons Delete , Mark as Read , or Mark as Unread .

Column name	Description
Delete	An icon that lets you delete the notification.
View	An icon that lets you view the details of the alert.
Read	An icon that displays the current read status of the notification. A closed envelope indicates an unread notification, while an open envelope indicates a read notification. Clicking on the icon will toggle the read/unread status of the notification.
Category	Note: This column was known as "Importance" prior to Triple'A Plus Release 13. An icon that tells you the category of the notification. The following icons/values exist: • one: No Importance. •  Success: The notification indicates that a process has been executed and finished successfully. •  Failure: The notification indicates that a process failed to execute in the correct fashion. •  Information: The notification informs you about a certain state of the system. •  Warning: The notification warns you about a certain state of the system. •  Error: The notification tells you that an error has occurred.
Follow up	An icon that lets you immediately navigate to the location that is of concern by the notification without having to view its details. The availability of this action is dependent on the nature of the notification nature.
Nature	An indication of the nature of the notification. The following natures are packaged with Triple'A Plus: • Report Execution: Notifications related to report executions. • Alert: Notifications related to alert definitions. • Alert Processing: Notifications related to alert processing • Task Assignment: Any notification related to a task assignment. • Task Reminder: Any notification related to a task reminder. • Contact Creation: Any notification related to contact report creations.
Sender	The sender (the user) who sent the notification. For notifications that are linked to an operation that was executed by a user, this is the user who executed the operation. As an example, for a report execution, the sender is the user who executed the report execution, while for a task assignment, the sender is the user who assigned the task. For notifications that are sent by the system, no sender is displayed.
Priority	The priority of the notification.
Subject	The subject of the notification. A notifications subject/body text can be defined in several languages. If, for example, there is a French version of the notification text, and you selected the French language for the WUI, the French subject of the notification will be displayed. If there is no French version of the notification subject/text, the system will display the English version.
Sent On	The date/time that the notification was sent.

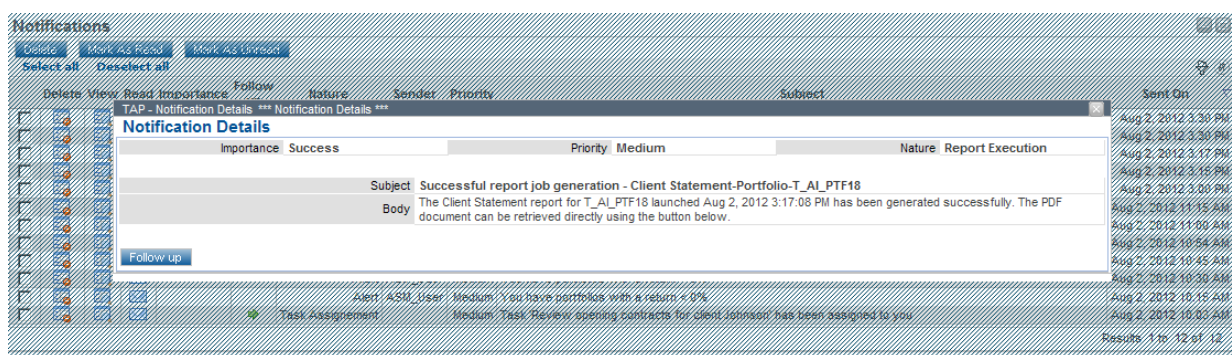

1.1.2.1 Viewing notification details

To view details of a notification, click on the View icon (under the View column) of the desired notification (for information about the View icon and column, see section

[Notifications](#)). Then, the system displays a window that contains information that is dependent on the nature of the notification:

- **Report Execution:** The notification subject and body text are displayed. When you click on the **Follow Up** button, you are redirected to the list of executed reports.
- **Alert:** The notification subject and body text are displayed. Below this information, the details of the alert as well as the results for the alert query are displayed.
- **Task Assignment:** The notification subject and body text are displayed. When you click on the **Follow Up** button, a pop-up window displays the details of the assigned task.
- **Task Reminder:** The notification subject and body text are displayed. When you click on the **Follow Up** button, a pop-up window displays the details of the task.
- **Contact Creation:** The notification subject and body text are displayed. When you click on the **Follow Up** button, a pop-up window displays the details of the task.

The following is an example of the notification details that are displayed for a notification linked to a report execution:

1.1.3 New Tasks

The **New Tasks** section is available only if the Task and Contact Management (TCM) component is installed. This section displays a list of new tasks that you created on the current day or created previously but is unread. A new task is a new entry on the task list and will remain on the list until you delete it.

The list of new tasks is sorted in descending order by creation date. You can modify the list (organized in a table) by clicking on the column heading. You can also edit a task, mark it as read/unread, mark it as completed, cancel it, or send it to the bin. An existing task defined as read is automatically removed from the task list. If you want to put the task back on the task list, you can define it as unread through the *Task History* feature TCM component. For more information about TCM and tasks, refer to the *Triple'A Plus Web Task and Contact Management User Guide*.

1.2 My Activities

My Activities is a tab in Daily Outlook that displays tasks that you must perform soon before they become overdue (for which you are the owner) and tasks that were assigned to other users by you that also must be performed soon before they become overdue.

My Activities contains the following sections:

- [My Overdue Tasks](#)
- [My Short Term Tasks](#)
- [Work Items List](#)

1.2.1 Viewing My Activities

To view My Activities, choose **Monitoring > Daily Outlook > My Activities**.

1.2.2 My Overdue Tasks

The My Overdue Tasks section is displayed only if the Task and Contact Management (TCM) component is installed. The section displays a list of tasks with due dates past (up to five days) the current date. More information about TCM and tasks can be found in the *Triple'A Plus Web Task and Contact Management User Guide*.

The list of overdue tasks is sorted in ascending order by due date. You can modify the list (organized in a table) by clicking on the column heading. You can also edit a task, mark it as read/unread, mark it as completed, cancel it, or send it to the bin.

My Overdue Tasks section provides the following tab views of your tasks:

- By category: Tree view by Task Category.
- By priority: Tree view by Task Priority.
- By status: Tree view by Task Status.

1.2.3 My Short Term Tasks

The My Short Term Tasks section is displayed only if the Task and Contact Management (TCM) component is installed. The section displays a list of tasks for the current date and for the next five days. More information about TCM and tasks can be found in the *Triple'A Plus Web Task and Contact Management User Guide*.

The list of short term tasks is sorted in ascending order by due date. You can modify the list (organized in a table) by clicking on the column heading. You can also edit a task, mark it as read/unread, mark it as completed, cancel it, or send it to bin.

My Short Term Tasks section provides the following tab views of your tasks:

- By category: Tree view by Task Category.
- By priority: Tree view by Task Priority.
- By status: Tree view by Task Status.

1.2.4 Work Items List

The Work Items List section is displayed only if the Task and Contact Management (TCM) component is installed. The section displays a replica of the Work Items List displayed in the Task and Contact Management (TCM) component. For more information, refer to the *Triple'A Plus Web Task and Contact Management User Guide*.

1.3 Notification History

The Notification History tab displays all notifications that have been sent to you, irrespective of their read status or date. The actions you can perform on this list are the same as those you can perform on the notifications list displayed under the Today's Events tab (see section [Today's Events](#)).

1.3.1 Viewing Notification History

To view Notification History, choose **Monitoring > Daily Outlook > Notification History**.

2 Process Monitoring

The Process Monitoring feature of the Triple'A Plus Web Monitoring module provides you with vital information on all processes that are running within the system and whose execution is coordinated by the Triple'A Plus workflow engine.

Note that these views are also available from the Client Data Management (CDM) components. The data displayed will always be the same, independent from where you access those views.

You can launch the following processes using the Process Monitoring feature:

- Launched processes – displays all processes that you have launched.
- Participating processes - displays all processes that you are participating in. You are considered a participant if you are the owner of one of its activities.

2.1 Viewing launched processes

1. Choose **Monitoring > Monitoring > My Processes**.

The Launched Processes tab (default tab) and the Participating Processes tab are displayed. On the default tab, the Process List screen is displayed with sub tabs (i.e., Active (default tab), Complete). The Active tab displays processes that you have started and are currently running. The Complete tab displays processes that have been completed but have not yet moved into the workflow engine history database.

Launched Processes		Participating Processes								
Process List									  	
Active		Complete								
Activity		Related to	Assignee	Owner	Status	Creation Date/Time	Completion Date/Time	Reassign		
Client opening process										
GCL_AP_CR2, STARTED Aug 10, 2011 9:34 AM

Number of distinct items: 1										

Number of distinct items: 8

2. Within each sub tab, the related processes are displayed in a table with columns. Some of the columns have hyperlinks, and it is entirely up to the process to determine this type of navigation.

Column	Description
Activity	Displays the following information: - The type of process that you have started. In the image above, the processes shown are "Client opening process" and "General advice provision process". - The process description for each occurrence you have started. In the image above, there are 2 occurrences of the "Client opening process": one called "518237 - Jean & /or Anne Duval, STARTED.." and another one called "Wenning, STARTED...". For the "General advice provision process", only one occurrence exists, and it is called "Swap - GM/Toyota, STARTED...". If you click onto the process description, the process redirects you to a relevant page. In the case of the client opening process, this is the concerned client. In the case of the collaborative advice, this page displays all process properties. - The name of the activities that have been executed, running, or are ready to be executed. In the image above, those activities are "Submission of the opening request", and "Validation of opening request". If you click onto the process description, the process redirects you to a relevant page. In the case of the client opening process, this link opens a pop up displaying the current information of the opening request: A client resume and all comments provided by the validators. In the case of the collaborative advice workflow, the name of the activity is not clickable. It depends on the process type, on whether this additional navigation is provided or not.
Related to	Displays contextual information of the activity. The data displayed depends on the associated process. If a process is, for example, coordinating the update of some data or concerns a client request, then you will find the client's name in this column.
Assignee	The person(s) that is/are assigned to this activity. This column contains only a value if the activity is in state READY. It means that none of your colleagues have started to work on this process, but that they are the ones who are candidate to do so.
Owner	After one of your colleagues has started work on the process, he/she becomes the owner of the activity, and his/her name is displayed as the column owner.
Status	Indicates the status of the activity.
Creation Date/Time	Indicates the date and time of creation of the activity.
Completion Date/Time	Indicates the date and time of completion.
Reassign	Lets you reassign the activity. It is only displayed if the activity is active.

2.2 Re-assigning activities

You can re-assign an activity to another assignee at any time if you think the current assignee is not the correct one.

1. Choose **Monitoring > Monitoring > My Processes**.

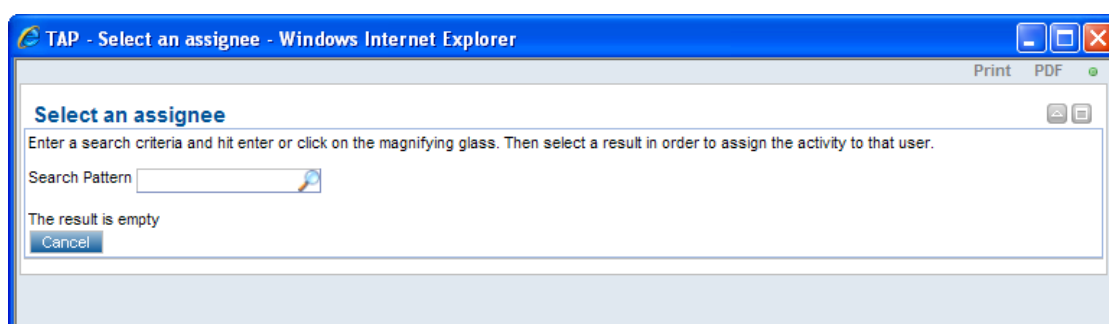

The **Process List** screen is displayed with sub tabs (i.e., Active (default tab), Complete).

2. Click the Active tab.

A list of active processes is displayed.

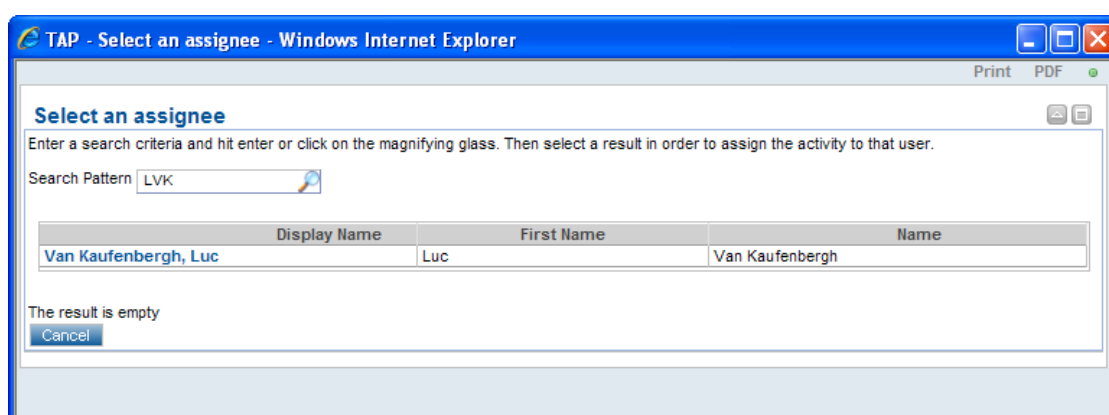

3. In the Reassign column, click the **Reassign** button of the process that you want to reassign.

The separate Reassign screen is displayed.

4. In the Search Pattern field, enter the full name or partial name of the user that you want to reassign the activity to. Then, click the magnifying glass.

A list of search results is displayed.

5. In the Display Name column, choose the user by clicking on the user's name.

The **Process List** screen is redisplayed with new information as follows:

- If the activity was not previously owned by a user, then the name of the new assignee is displayed in the Assignee column.
- If the activity was previously owned by a user, then the activity instance is cancelled (its status shows "Cancelled") and a new instance is created with the name of the new assignee but no owners. The status of the new instance is "Ready".

2.3 Viewing participating processes

1. Choose **Monitoring > Monitoring > My Processes**.

The Launched Processes tab (default tab) and the Participating Processes tab are displayed.

2. Click Participating Processes tab.

The **Process List** screen is displayed with sub tabs (i.e., Active (default tab), Complete). The Active tab displays processes that you have started and are currently running. The Complete tab displays processes that have been completed but have not yet moved into the workflow engine history database.

Launched Processes		Participating Processes						
Process List								
Active		Complete						
Activity		Related to	Assignee	Owner	Status	Creation Date/Time	Completion Date/Time	Reassign
Client opening process
